Any system to any environment recovery

Top-notch backup speed and recovery reliability

Enterprise-grade scalability

Unique AI-based ransomware protection

Protection for 20+ workloads

Brought to you by

Protecting a business' most valuable asset with

# Acronis Cyber Backup Cloud

## Reduce Complexity with One Solution for All Systems

Streamline your data protection efforts using just one solution. Acronis Cyber Backup Cloud supports Windows and Linux servers and VMs, eight major hypervisors, PCs, Macs, iOS and Android mobile devices, Microsoft on-premises apps, SAP HANA, Oracle Database, Office 365, G Suite, and websites.

## Choose Backup Storage that Fits Your Business Needs

Comply with business requirements and industry regulations by choosing the right storage for your needs. Backups can be stored on-premises, in the secure Acronis Cyber Cloud Storage, public clouds, or a local storage provider.

## Give Ransomware No Chance

Defend your files and backups from ransomware. Traditional backup software is vulnerable to attacks that can delete backup files. Acronis Cyber Backup Cloud shields them with the backup industry's only artificial intelligence-based anti-ransomware technology.

## Avoid Complicated Setup and Maintenance

Forget about implementation hassles. Acronis Cyber Backup Cloud is a turnkey, all-in-one BaaS solution, with almost no requirements or special prerequisites for customers. Only a lightweight backup agent is needed for installation.

## Recover Files in Seconds Wherever and Whenever Needed

Enjoy the solution's web-based, touch-friendly console to access backups and restore files wherever and whenever it's needed. You won't need to contact your MSP to execute basic tasks.

## Recover Systems to Any Environment or Hardware

Migrate or recover Windows and Linux systems swiftly to the same, similar, or dissimilar hardware, including bare-metal, physical, virtual, or cloud environments using built-in Acronis Universal Restore technology.
